

DW833 LED REMOTE DISPLAY

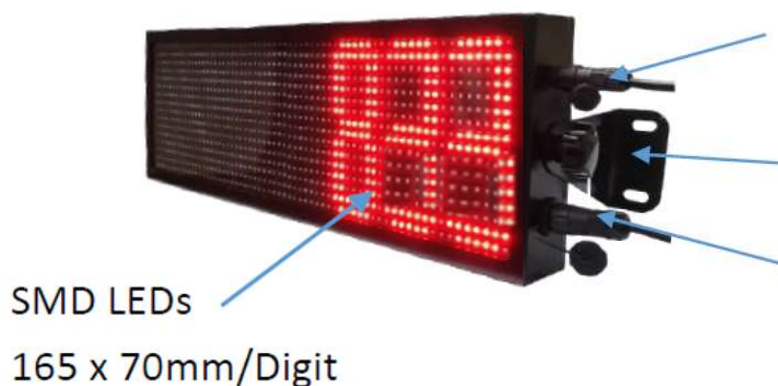

The Clearly Visible External Display

DW833 LED Remote Display is an integrated to a weighing terminal for easy to read displays mean that operators do not need to walk around a site checking readouts. , red LED(SMD) characters can be seen from up to 200 feet and with a filtered lens are clearly visible both indoors and outside. The remote displays use auto-learn technology to make installation quick and easy.

The remote displays have a wide range of preinstalled programmes for different weighing applications and can display data in either tones or kilograms with the gross and net weight.

Size & Specification
